

MiniBull AMA Sniper Pro (cTrader cBot)

An automated AMA200/AMA9 trend-following cBot with Slope Confirm.

Minibull AMA Sniper Pro trades two Kaufman Adaptive Moving Averages (AMA200 trend + AMA9 fast) with a Slope Confirm filter: price position alone isn't enough — the AMA's own slope must agree with the direction, or the signal is cancelled back to Neutral. Auto-detects Swing (Daily+ chart: AMA on Daily, signal on H1 close) vs Scalp (below Daily: AMA on H1, signal on M5 close) from the chart's own timeframe.

Risk management: per-trade Take Profit/Stop Loss in USD (not price distance), a portfolio-wide Disaster Stop Loss, daily trade limit, direction filter (Both/Buy/Sell), optional NYSE/Nasdaq session filter with automatic US DST handling. Always trades the broker's minimum volume.

Live on-chart panel (mode, signal, AMA values/slopes, session, open P/L) plus automatic support/resistance lines across 8 timeframes. Signal arrows backfill on attach — no repaint, only closed bars used. Fully functional on live accounts in real time.

Pricing

Buy outright: **1300 USD**

1 Month: **49 USD**

3 Months: **113 USD**

6 Months: **230 USD**

1 Year: **490 USD**
